

...keeps everything in order

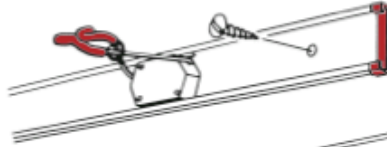

...keeps everything in order

Since 1986 the Bruns company, which is based in Harsewinkel / Germany, is producing the now well known "Bruns-Tool-Holder". Invented by Franz Bruns and further improved by his son Günter, who is since 1997 successfully running the family business, the product range has been permanently enlarged. Due to the enlargement of our product range new production areas have been built. Our customer satisfaction is always guaranteed not only because of high quality products but also because of our outstanding flexibility and performance.

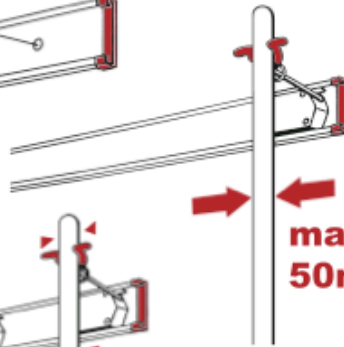

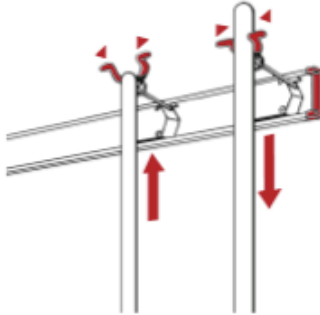

To fix separately.

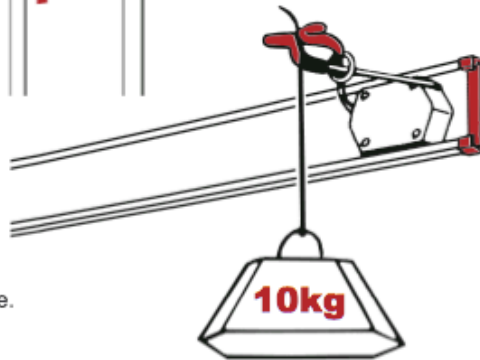

Accepts objects in a clamping range between 0 - 50mm.

Lifting up - the holder opens.  
Down - the holder grips the tools.

To hang on or put up tools, lift up the holder.

Accepts objects up to 10 kg.  
Maximal capacity per/m rail 40 kg.

On the rail the tool-holders are adjustable.
